AVI-SPL's Control Room Group to Exhibit at DistribuTECH 2010

CRG to Spotlight the Utility Control Room in a Box (CRiB) at Booth 1344

TAMPA, Fla. March 17, 2010 – AVI-SPL's Control Room Group (CRG) today announced it will exhibit at DistribuTECH Conference and Exhibition 2010, which will be held at the Tampa Convention Center, Tampa, Fla., March 23-25. The Control Room Group specializes in the design, integration and support of the 24/7/365 mission critical control centers used in the electric power transmission and distribution industry.

Exhibiting in Booth 1344, the Control Room Group will demonstrate the Control Room in a Box (CRiB). The system uses standard off-the-shelf components and can be custom designed to meet the unique requirements of the control center staff. The CRiB is affordable, scalable and can be installed in less than one day. The CRiB includes a large screen display system to ensure situational awareness, primary and secondary monitors, video processing, a human machine interface (HMI), an operator console and an intensive use chair.

"Exhibiting at DistribuTECH allows the Control Room Group to directly interface with the electric T&D professional and present to them the latest in network operations center facility technology," said David Jones, sales manager, AVI-SPL's CRG. "Because the Control Room Group works only in the mission critical control room environment, we are able to bring the latest technology, like the CRiB, directly to the data center and network center operational staff. Whether the facility employs a two or 20 person staff, the Control Room Group can match proven technology and technique to the unique requirements of our clients."

According to the event web site, DistribuTECH is celebrating 20 years as the leading annual T&D event. The conference covers automation and control systems, energy efficiency, engineering, demand response, renewables integration, power delivery equipment and water utility technology.
