RECHARGEABLE WIRELESS PRESENTER MOUSE

- Fully integrated 3-in-1 presenter mouse
 - Built-in laser pointer
- Conveniently operates while recharging

P/N VP6510

The Interlink Rechargeable Wireless Presenter Mouse from SMK-Link is a high-resolution optical mouse with integrated PowerPoint presenter and a built-in laser pointer designed for professionals who need a mouse and a reliable presentation tool and yet wish to travel light.

Beneath the sliding door, the presenter features SlideShow/Esc, Dark Screen/Resume, and Application Switch, in addition to the standard Next Page/Previous Page controls. Offers up to 33-feet of reliable wireless transmission, the device is Earth-friendly with its in-use recharging capability via the included USB cable. No more disposable batteries and never lose productivity again.

The ambidextrous notebook presenter mouse, with a built-in storage for its receiver dongle, is designed for comfortable use for both right- and left-handed users. The device offers true plug-and-play capability, instantly works with any host computers without the need to install software driver.
