ATX 3-60

>> INCREASE YOUR COMPETITIVE EDGE

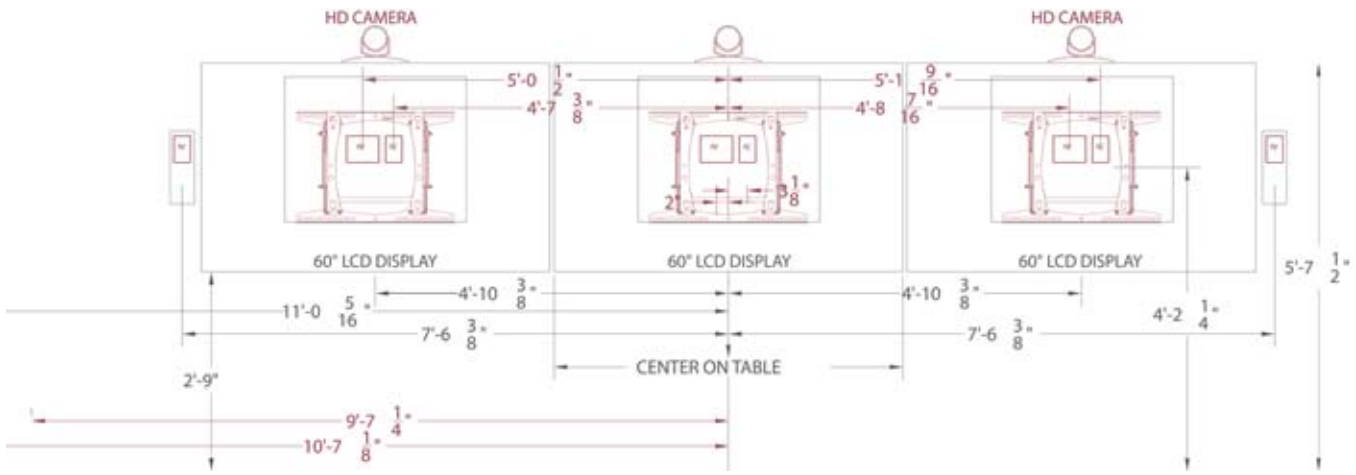

Faced with the challenge of an ever-changing global economy, an immersive Telepresence solution delivers the strikingly effective communications presence needed to keep you ahead of the competition.

With more cost-effective options than other Telepresence furniture and display packages, **AVI-SPL's exclusive ATX 3-60** provides the high-quality communications environment your organization needs -- without the sacrifice to your budget.

Why choose AVI-SPL's ATX 3-60 solution?

- You're interested in the exclusive benefits of a fully-configured, turnkey Telepresence system, with the flexibility to explore customized options
- Special accommodations are needed to integrate your telepresence system, accounting for the size and uniqueness of your environment
- You're seeking a high-quality telepresence environment that supports a streamlined budget

As a critical feature, our ATX 3-60 solution is powered by the Polycom's ATX 300 codec engine. In addition, a full expanse of capabilities allows users to see facial expressions, make eye contact and read body language with HD video supporting up to 1080p. This flexible Telepresence room solution includes three 60" screens and customizable options for high-quality tables, displays and more.

From concept to completion: AVI-SPL can integrate our ATX 3-60 solution to meet your needs

Immersive Telepresence Solutions

With AVI-SPL's ATX 3-60 solution, you can:

- Empower executives and subject matter experts to make decisions at a moment's notice, even when individuals are not in the same office or the same country
- Allow users to see facial expressions, make eye contact and read body language with HD video supporting 720p/60 or 1080p/30 fps
- Increase productivity since workers spend more time working and less time traveling
- Strengthen business relationships through regular, face-to-face meetings
- Share ideas across distances through content sharing and collaboration
- Channel limited financial and human resources into more productive efforts
- Accelerate decision making and reduce time to market

>> THE AVI-SPL ADVANTAGE

AVI-SPL is dedicated to providing our clients with a full range of comprehensive design, integration solutions and support, ensuring that your existing and evolving needs are fully met. Our highly-skilled technicians can seamlessly integrate our ATX 3-60 solution into your unique environment, with a keen understanding of meeting spaces,

furniture, displays and décor and content display implementation.

Through key partnerships with advanced video communications leaders like Polycom, we utilize industry-leading codecs, cameras, software and configuration tools to support your distinct deployment requirements. In addition, AVI-SPL's exclusive ConferencePoint Telepresence VNOC services are approved to support the complete line of Polycom Telepresence products, including the Polycom RealPresence™ Experience (RPX™) and Polycom Telepresence Experience® (TPX®) telepresence solutions.

>> OUR COMMITMENT TO YOUR SUCCESS

AVI-SPL's highly-certified team provides the following design/build services:

- Full-service audio and video, design/build and integration
- Integration services that provide project management and installation of all technical systems in coordination with the construction team
- Post-installation support, including preventative maintenance, rental, logistics and creative services

AVI-SPL'S EXCLUSIVE ATX 3-60 ROOM SOLUTION FEATURES:

- Definitive power from Polycom's ATX 300 engine
- Three HD 60" LCD flat panel displays for superior visual quality
- Three integrated, high-resolution content displays
- Crestron control unit and touch panel interface
- Ceiling-mounted microphones
- An executive control panel for call launching at the simple touch of a button
- An effective design that allows the room to be used for any meeting, even when the Telepresence system is not in use
- Accommodations for up to 6 participants in a Telepresence call
